

Jelizaveta Vetaskova

Junior Full-Stack Developer

✉ vetaskovaelizaveta741@gmail.com ☎ +371 24 814 580 📍 Liepāja, Latvia 🔗 LinkedIn 🌐 GitHub

SUMMARY

Junior full-stack developer with experience of the full development cycle from database design to production deployment. Developed and defended a PWA from scratch as a diploma project. Currently developing a historical dictionary web application using Java Spring Boot and React. Looking for a full-stack developer position.

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer

Ventspils University of Applied Sciences

02/2026 – 12/2026

Ventspils, Latvia

- **Bulk import of dictionary articles** - developed a bulk import system from .docx files with automatic duplicate detection, using the Apache POI library
- **De-duplication** - developed a duplicate detection system based on fuzzy string matching (Levenshtein distance)
- **REST API** (backend) - developed REST API and services using Spring Boot for managing dictionary articles, authors, and literature references
- **React forms** - created forms for adding and editing content using React with role-based access control
- **Production deployment** - configured and maintain the deployment pipeline with Debian server and Nginx

EDUCATION

First-level Professional Higher Education Diploma in Programming Specialist

Ventspils University of Applied Sciences

09/2024 – 06/2026

Ventspils, Latvia

Qualification: Programmer

Coursework focused on backend development and Java/Spring Boot

Diploma project: SKAITRIXA - mental arithmetic training platform for primary school students, built with React, TypeScript, and Supabase

SKILLS

- **Languages & Frameworks** — Java | Spring Boot | TypeScript | React
- **Databases** — MariaDB | PostgreSQL
- **Testing** — JUnit | Mockito | Vitest | React Testing Library | Cypress
- **Version Control** — Git
- **DevOps & Infrastructure** — Nginx | systemd | SonarQube | Certbot

LANGUAGES

Latvian

Russian

English

PROJECTS

SKAITRIXA

Mental math training platform for primary school students

02/2026 – 05/2026

Main technologies: React, TypeScript, Supabase, Vite

- Developed the full application cycle - from database structure to a PWA with offline mode
- Developed an admin panel with CRUD for schools, classes and users, a system for teachers to create tests and students to complete them
- Developed unit tests (Vitest + React Testing Library) and E2E tests (Cypress)
- Caught a critical timer-related bug through E2E testing
